Getting into Virtual Reality

Step into the virtual world, but not just any world, one that you have created. Using JavaScript code, you will create virtual worlds that you can explore and interact with. You'll learn the basics of several concepts of 3D graphics and how they can be applied to create an immersive world experienced through a VR headset.

What are the entry requirements?

No formal requirements; students will require a familiarity with writing JavaScript code, ideally by completing the college's Introduction to Programming course. They will also need to be familiar with using a VR headset, perhaps by completing the college's What is Virtual Reality course.

Need more information?

You can find out more about Northern College and the courses on offer by calling us on 01226 776000 or emailing us_courses@northern.ac.uk

What can this course lead to?

All equipment is provided.
